

# Siconnex BATCHSPRAY® Clean Autoload: High process performance through automation.

The four-chamber clean system is automatically load and unload with Siconnex BATCHSPRAY® Autoload. The effective use of our fully automated robot systems with the patented Retainer Comb Handling (RCH) transfer equipment enables very high throughputs to be achieved, while the closed design helps to keep the products clean. Available for 8" substrate sizes.

## ADVANTAGES

- Automated dry-in, dry-out process
- Compatibility with SMIF, FOUP and standard carriers
- Throughput of up to 400 wph
- Equipment footprint < 9 m<sup>2</sup>
- Fully automated robot loading
- Impressive process performance with the patented RCH System
- Flush mounting possible thanks to the completely enclosed design

siconnex

## CLEAN

- SicOzone Clean
- SicOzone + Ultra Diluted Clean Applications
- Organic Removal & Clean
- Etch Residue Clean
- Post Ash Residue Clean
- Prediffusion Cleans
- Field Cleans (Organic & Inorganic Cleans)
- Polymer Clean

## RESIST STRIP

- SicOzone Strip
- Positive and Negative Resist Strip
- Implanted Photo Resist Strip
- Resist Rework
